Success In Any Business Requires Traffic

The first thing to agree on is that traffic is essential. You could have the best online business in the world but unless you can get eyeballs to your site, your business isn't going to grow.

And that's what this document is about. I'm going to show you how I use VitalViral to grow my business and hopefully you'll see the sheer power and simplicity of the techniques I use.

So What Is VitalViral?

VitalViral is a program that will harness the power and potential of a massive source of free traffic - traffic exchanges. If you've not heard of traffic exchanges, that's great because I'll explain exactly how they work.

If you **have** heard of or tried traffic exchanges but are less than excited to hear that's what this document is about, suspend your judgment for 5 minutes. Most people that have tried traffic exchanges did so without knowing how to leverage their power and that's what this method is all about.

A traffic exchange is a way of exchanging traffic with other website owners. Generally you're exchanging traffic with other people like yourself that are looking to promote something.

So where does the traffic come from that you 'exchange'? Good question...it comes from you!

You generate traffic by viewing other peoples websites and each website you view earns you an 'advertising credit'. You can then spend those credits on getting visitors to your site.

Now here's why most people try traffic exchanges and then give up. Earning credits by viewing other peoples websites is hard work and it's tedious. At least it's tedious if you have to view 1 site to get 1 visitor to your own site.

But what if for every 1 site you view, you're getting 10 visitors to your own site? Or 100? Or more?

What if you got visitors to your site even when you didn't view other peoples websites?

It wouldn't be so tedious then, would it?

VitalViral enables you to achieve that kind of leverage. VitalViral is a website and system but it's also a training resource that shows you exactly how you can get hundreds of visitors to your own site for just browsing a few peoples sites yourself.

Just take a look at one of the businesses I promote: [my business](#)

By using VitalViral, I can potentially send hundreds or even thousands of visitors a day to that site. Will they all join? Of course not. But since I'm sending all those visitors to my site for very little effort and little or no cost, having 1000's of people seeing my website can only be a good thing.

And I've shown you my business but VitalViral will work for your business just as well.

A New Strategy

The key to making VitalViral work for you is to realise that from this moment on you need to think of yourself as having two businesses: your main business and your traffic business.

VitalViral will be your traffic business. Like any business, it needs to be promoted. So just as you promote your main business to grow it and your potential income, so you will grow your VitalViral business to grow your **potential traffic**.

And if your main business is a multi-level business then you'll be well aware that the key to getting your business to grow is to introduce other members as your 'downline' that will then help **you** grow **your** business.

It's the same with VitalViral only this time you have a **very simple business proposition!** Instead of looking for people to join a business, you're going to be showing other people, who have their own businesses to promote, a way to get more traffic to their business. Are they going to join your traffic business? You bet they are. You are offering them almost a no-brainer proposition - who wouldn't want more traffic?

So you introduce other people into VitalViral. As a result, some of those people automatically become part of your downline in various traffic exchanges. And then **you** start earning advertising credits from **their** efforts!

Now many people try using traffic exchanges to promote their main business. And what happens? They work hard, earn credits and spend all those credits on promoting their main business.

Result? Their main business grows a little (because they only generate a little traffic) but they never grow a downline in the traffic exchange.

Compare this with someone using VitalViral. They use some of their advertising credits to promote their traffic business (VitalViral). Initially this means they're sending less traffic to their main business. But what they **are** doing is building their traffic business. Every day, people are joining their VitalViral site and as a result joining some of the traffic exchanges below them.

This results in them getting more advertising credits for the same amount of effort and soon they're sending **more traffic** to their main business **and** to their traffic business than they were ever doing before. And this just **snowballs**.

Thousands of people are discovering traffic exchanges every day. Most of them will bite your hand off for any system that helps them get the most out of the traffic exchanges and you're offering them a win-win with VitalViral !!

Why is VitalViral so effective?

Imagine that you realised for yourself that you need to grow a downline in the traffic exchanges to get the leverage of earning a percentage of the credits earned by your downline.

How would you do it? You can't promote your traffic exchange (let's use TrafficSwarm as an example) within TrafficSwarm because all the people on that exchange are **already** members! So you would have to find a different place to promote your TrafficSwarm affiliate link. And that's just to try to grow a downline in **one** traffic exchange.

By having a VitalViral account, you have your own VitalViral website to promote. Just **one** site and you promote it **anywhere**. Every time someone joins, you are automatically presenting that new member with **all** your affiliate links for **all** the traffic exchanges you're a member of.

So you can end up with that new member joining you in 1, 2, 5 or 10 or more traffic exchanges, just by promoting your VitalViral affiliate link. **That's powerful!**

Once your VitalViral business starts growing, your downlines in the traffic exchanges will be growing and you'll start earning more and more advertising credits. Now you'll have much more traffic to promote your main business. And the great thing is that once you kick it off, your VitalViral business will never stop growing. And if you ever need traffic to promote **anything**, your VitalViral business will always be there.

Even if you switch businesses in the future, your VitalViral business (your traffic business) will be right there to start sending traffic to your new venture **immediately**.

Having your own traffic business is a huge, valuable resource!

I could tell you about more of the features and benefits of VitalViral but the easiest thing is to send you right over to get your free account. Just click on the link below:
